Top Tips before you start!

1. Please check that all parts are present before you start the assembly of your furniture, as once assembled, the furniture is exempt from our home approval policy.
2. For ease and speed of assembly, we recommend that before you commence each step of the assembly, you identify all the parts required for that step.
3. For larger items, please ensure that you have sufficient space and people (as indicated on page 1) to assemble your product safely.
4. We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
5. For the protection of your furniture, particularly items of high gloss finish, we recommend that the product placed on a protected surface during assembly to prevent any damage.
6. During assembly please take care not to over-tighten any fittings, as this may damage the product.

Care and Maintenance of your Furniture

- Please periodically check all fittings and re-tighten as necessary.
- To clean your item, please use a damp cloth and wipe clean.
- Please do not jump on your furniture.
Never allow any kind of liquid to remain on your furniture, Absorption can cause finishes to de-laminate.
- Periodically check the condition of your bed slats to ensure they are in good condition.
- This is very important when moving your bed. It is best to lift the bed, and never to drag it.
- Please kindly take account of your floor covering when assembling a new bed! If the floor offers little resistance (such as wood or laminate) then it is recommended that rug or similar be placed under each leg.

CARE INSTRUCTIONS FOR VELVET FABRIC

- If liquid has spilled onto the velvet, soak it up with a paper towel or cloth. Make sure there is no food or debris left on the material. Combine a small amount of dish soap and water in bucket, mixing it until it becomes soapy. Soak the cloth in the soapy water and apply it gently to the stain. Use the soapy cloth to blot the stain until it disappears. It is important for the velvet fabric to dry quickly. Use a hair dryer on a luke warm setting to accelerate the drying process.
- Carefully apply the upholstery cleaner to velvet with soft sponge, leaving the velvet's pile undisturbed. After it is clean, be sure to vacuum and brush the velvet follow the grain always.
- A steam cleaner is perfect for removing stains, dirt and debris and disinfecting the velvet fabric without leaving any damage.
- If you have concerns regarding liquid/stain removal on your product, please consult a professional cleaning company.
